DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 2-15 and 17-39 have been considered but are most in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 2-15 and 17-39 rejected under 35 U.S.C. 103(a) as being unpatentable over *Kienzle, III et al* (US 6,285,902 B1) in view of *Martinez* (US 4,577,629) and *Lichtenstein* (US 4,370,983).

Kienzle, III et al substantially disclose all claimed features in claims 2-15 and 17-39.

Claims 2, 5, 7-11, 20, 23, 30, 31, 38, and 39: Kienzle, III et al disclose a method and apparatus where an imaging guided surgery system with computer includes an image guided surgery software that provides an minimal user functionality by having specific software enabled to apply preselected surgical procedure and software-integrated kit for instrumented tools and digital medium with image guided surgery software to facilitate the performance of the surgical procedure and a tracking system to locate the surgical tools via display used in conjunction with the computer (col. 4, line 16 – col. 5, line 13; col. 6, lines 25-35; col. 8, line 14 – col. 9, line 44). However, Kienzle, III et al do not disclose that the surgical tools are disposable kit. It is well known in the art that the surgical tools or instruments are disposable for safety reason where the

Art Unit: 3737

Page 3

tools are discarded to disposed until the tools are sterilized as shown by Martinez for example. In addition, Kiezle, III nor Martinez discloses that the software is disposable. However, this feature in particular is depending on application of the surgical or medical procedure and the functionality of disposing software is well known in the art as demonstrated by Lichtenstein (col. 32, lines 27-52). Although, Lichtenstein's invention is directed toward infusion of physiological fluid, the disposing of software application for microcomputer control device is well disclosed. Therefore, it would have been obvious to one having an ordinary skill in the art at the time the invention was made to apply the teachings of Martinez's disposable surgical tools and Lichtenstein's disposable software kit to the method and system of Kienzle, III et al described above.

Claims 3, 4, 6, 12-15, 17-19, 21, 23, 24-29, and 32-37: Kienzle, III et al disclose a mobile cart 125 that holds computer 121, 124 and display 122 which receive and display digital data obtained from the imaging unit 112 as shown in figure 1. In addition, the image-guided system includes position-monitoring sensor 123 tracking the position and movement of the surgical tools. Furthermore, Kienzle, III et al disclose image mapping of the where image guidance is referenced from the image coordinate correlated to position sensor and tracking device (col. 11, line 31 – col. 12, line 20).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William Jung, Ph.D. whose telephone number is 571-272-4739. The examiner can normally be reached on Mon-Fri 8:30 AM to 5 PM.

Application/Control Number: 09/978,599

Art Unit: 3737

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Brian Casler can be reached on 571-272-4956. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
